Secure Generic Login
Healthcare Environment Data and Survey Software (HEDSS)
Information updated: November 10, 2017

The Generic login for Healthcare Environment Surveys is intended for the simplest access to a secure electronic survey. The Generic link will need a code unique to the desired survey. For example, Code15 would be used to access the desired survey/audit after selecting the generic link. The code is case specific, so pay attention to capital and small case letters. The code to access the survey/audit is selected by the client or suggested by staff within Healthcare Environment for client approval.

Secure generic link:

https://hcesurvey1.com/SurveysApp/bin/wc.dll?hesprocess~unlisted_userpg1

To return to the survey, enter an email at the same time as the pass code, using the second box provide. A link will be sent to this email and the responder to the survey/audit can reenter the same survey to complete if desired to respond over time rather than in one sitting.
